PROFESSIONAL SUMMARY

Senior Solutions Consultant with 14 years in enterprise technology delivery, now focused on pre-sales solutioning and AI-native customer data platforms across fintech, banking and retail. Currently leads the technical architecture practice at a Sub-Saharan martech consultancy, owning discovery, solution design and C-suite engagement on enterprise Braze, Amplitude, OneSignal and DOMO programmes. Certified 8x Braze, 7x Amplitude and AppsFlyer Reseller Solution Architect, and a hands-on builder of production GenAI tooling using the Claude API and Model Context Protocol. Based in Bahrain and aligned to Vision 2030 digital and AI acceleration priorities.

SELECTED ACHIEVEMENTS

- Leading a dual AppsFlyer and Amplitude onboarding and implementation for Melon Mobile, delivering **phase one on time and accurately in six weeks**.
- Built internal delivery tooling that cut typical client onboarding from **~6 months to ~8 weeks**, replacing open-ended implementations with tight, time-boxed programmes.
- Advised prospects on technical architecture during pre-sales, directly contributing to the close of enterprise Braze, OneSignal and Amplitude contracts.
- Built and deployed an MCP-based AI knowledge agent into live sales operations, integrating HubSpot, Notion and Zendesk through the Claude API.
- Guided a West African fintech's omnichannel messaging build, supporting growth from low thousands to **100,000+ active users**.
- Architected identity resolution for the OM Bank digital banking launch, unifying **140,000+ client identities within three months** ahead of go-live; the bank has since scaled past 740,000 customers (H1 2026).
- Delivered multi-market programmes across South Africa, Angola, West Africa, Australia, the USA and the UK, in English, Francophone and Lusophone environments.

CORE COMPETENCIES

Pre-Sales & Solutioning: Technical discovery | Solution architecture | PoC & PoV delivery | Enterprise demonstrations | RFP and security questionnaire support | C-suite stakeholder engagement

Customer Data & Engagement: CDP strategy and implementation | Identity resolution | Campaign orchestration | Segmentation and personalisation | Omnichannel activation | Product analytics | Mobile attribution and deep linking

AI & Automation: Claude API | Model Context Protocol (MCP) | GenAI workflow integration | Agent design and deployment | Make.com / n8n | Google Generative AI Leader certified

Data & Integration: End-to-end data pipelines | REST API integration | Webhook engineering | Google Tag Manager | Event tracking architecture | BI and executive visualisation

PROFESSIONAL EXPERIENCE

YOUKNOW TECHNOLOGIES — Johannesburg, South Africa

Senior Solutions Consultant ***Oct 2024 – Present***

- Lead the technical architecture practice, directing a consultancy team implementing the YOUKNOW stack (Braze, OneSignal, InsiderOne, Amplitude, DOMO, HubSpot) for high-growth fintech and retail clients.
- Leading the dual AppsFlyer and Amplitude onboarding and implementation for Melon Mobile, covering mobile attribution, deep linking and product analytics; phase one delivered on time and accurately in six weeks.
- Own pre-sales technical advisory: architecture discovery, solution design and objection handling with prospect C-suite and IT stakeholders, contributing directly to enterprise contract closures.

- Built internal delivery tooling that turned open-ended, perpetual client onboarding into tight, time-boxed platform implementations, cutting typical onboarding from **~6 months to ~8 weeks** and consistently landing ahead of schedule.
- Orchestrated technical delivery for a fintech lender (Wonga), Old Mutual's new digital bank (OM Bank) and a major Angolan bank (Banco Millennium Atlântico), establishing marketing automation foundations in regulated financial environments.
- Designed, built and deployed an internal MCP-based Slack knowledge agent in Node.js, TypeScript and Python, integrating HubSpot, Notion and Zendesk via the Claude API to give the sales team conversational access to dispersed account knowledge.

Solutions Engineer: CX & Analytics ***Aug 2023 – Sep 2024***

- Guided the OneSignal implementation for a West African fintech app, enabling omnichannel messaging through rapid growth to 100,000+ active users.
- Deployed Amplitude Analytics across a major retail group's three-brand portfolio (Cape Union Mart, Old Khaki, Poetry) and built an automated lead-tracking pipeline in Google Tag Manager.
- Developed a full Olympics data application on DOMO, managing the lifecycle from acquisition through to executive visualisation.

AI & AUTOMATION PORTFOLIO

Independently designed, built and deployed. Source code and live deployments available for review.

- **Run DNA Cards —** GPX upload application generating personalised collectible running cards via AI. Claude API and Cursor. run-dna-cards.vercel.app
- **Tile Predictor Pro —** Probabilistic gameboard prediction tool; users upload prior-round screenshots and the model predicts subsequent jackpot tile placement. tile-predictor-pro.vercel.app
- **Claude skills ecosystem —** Suite of reusable agent skills automating document generation, brand-consistent output and structured research workflows.
- **Applied tooling —** SARS 2026/27 tax calculator, South African ETF exposure dashboard, and a forensic HAR-based audit of a retail Amplitude implementation.

EARLIER CAREER

INQUBA — Johannesburg | Mar 2017 – Aug 2023

Business Analyst (Jul 2021 – Aug 2023): designed and implemented enterprise CX programmes for African Bank, Virgin Active, Discovery Vitality and Peermont; facilitated Agile sprints translating business requirements into the product roadmap and user journey optimisation.

Service Delivery Manager (Nov 2018 – Jul 2021): led a multicultural service team supporting clients across South Africa, Australia, the USA and the UK; owned service delivery and post-implementation CX support for CapGemini, Suncorp Insurance, TFG, Goodyear Beaurepaires, Sun International and Peermont; translated user feedback into product enhancements.

Service & Operations Support Analyst (Mar 2017 – Oct 2018): delivered first-line technical support via Zendesk to Customer Success Managers and end users across three time zones; streamlined support processes for a 20% reduction in response time.

AUTOMATED OUTSOURCING SERVICES — Johannesburg | Mar 2012 – Feb 2017

Operations Analyst (Jul 2013 – Feb 2017): maintained software and data operations on Oracle Flexcube for South Africa's largest unit trusts and ETFs, including ABSA, Satrix and iTransact; conducted gap analysis and documented business and functional processes in a regulated financial environment.

Earlier roles: Change Management Operator (Sep 2012 – Jun 2013); IS Operator (Mar 2012 – Aug 2012).

CERTIFICATIONS & TECHNICAL TOOLKIT
